Horse and Deer Flies

by a few of these persistent flies can make outdoor work and recreation miserable. The numbers of flies and the intensity of their attack vary from year to year.

Female horse flies and deer flies are active during the day. These flies apparently are attracted to such things as movement, shiny surfaces, carbon dioxide, and warmth. Once on a host, they use their knife-like mouthparts to slice the skin and feed on the blood pool that is created. Bites can be very painful and there may be an allergic reaction to the salivary secretions released by the insects as they feed. The irritation and swelling from bites usually disappears in a day or so. However, secondary infections may occur when bites are scratched.

Horse flies and deer flies are active for specific periods of time during the summer. Repellents such as Deet and Off (N-diethyl-meta-toluamide) can protect humans

for several hours. Follow label instructions because some people can develop allergies with repeated use, look for age restrictions.

Permethrin-based sprays are labeled for application to livestock and horses. These insecticides are very irritating to the flies and cause them to leave almost immediately after landing. Often, the flies are not in contact with the insecticide long enough to be killed so they continue to be an annoyance. These flies will swarm persistently around animals and feed where the spray coverage was not complete (underbelly or legs) or where it has worn off. Repeated applications may be needed.

Check the label about minimum retreatment intervals. Pyrethrin sprays also are effective but do not last as long as permethrin.

Horse fly and deer fly larvae develop in wet or moist areas, such as wetlands, or along creek and river banks, where they are predators. Consequently, it is impossible to locate and eliminate breeding sites. Also, the adults are strong fliers that may be coming from some distance away. That leaves personal and animal protection as the only viable choices.

Educational programs of the Cooperative Extension Service serve all people regardless of race, color, age, sex, religion, disability or national origin.

Lavandula (common name **lavender**) comprises 39 species of flowering plants in the mint family. It is cultivated extensively in temperate climates for use as ornamental plants for garden and landscape use, as culinary herbs, and also to produce essential oils, which are used in perfumes, medicinal treatments and in beauty products. Bunches of it can repel insects.

Estill Longbeards To Host Jakes Field Day

The Estill County Longbeards Chapter of the National Wild Turkey Federation (NWTf) is hosting a JAKES field day event full of outdoor activities, Saturday, Sept. 28, 2013 at the Estill County Fairgrounds in Irvine.

There will be games, lots of prizes, a Take Aim trailer, bait casting competitions, special demonstrations by Kentucky Dept. of Fish & Wildlife Resources, and a turkey call demonstration.

The morning session (10:00 a.m. -- 12 Noon) will be for grades 3-5. The afternoon session (2-4 p.m.) will be for grades 6-12. Lunch will be served to all ages from 12 Noon until 1:30 p.m.

The field day will provide opportunities for youth to experience the outdoors

through hands-on events, education, fellowship and family fun. Those attending the JAKES field day will learn about hunting, camping, fishing and many other conservation-related topics.

"JAKES events allow youth to try new things by engaging them in all kinds of outdoor activities, sports and seminars," said Mandy Harling, the NWTf's JAKES program coordinator. "This event will bring together active kids with 'get up and go' attitudes who share an interest in something bigger than themselves - wildlife and conservation."

The NWTf's JAKES program (Juniors Acquiring Knowledge, Ethics and Sportsmanship) teaches the principles of wildlife management and safe, ethical and responsible hunting to youth up to age 12. The NWTf also offers the Xtreme JAKES program, which is designed for teens 13 to 17 years old, and provides opportunities and challenges more in-line with older JAKES members' abilities and experiences. Hands-on activities during JAKES/Xtreme JAKES events across North America include fishing, archery, hiking, mountain biking and game calling, as well as instruction on hunting, conservation, the wild turkey and more.

JAKES members across North America receive JAKES Magazine, which features fun and educational articles focused on items of interest to young readers.

Each JAKES event focuses on conservation and outdoor recreation, with expert instructors teaching important lessons in wildlife management tied into a strong family-values theme. With an emphasis on fun, the events keep kids interested while learning.

HERE IS A PLEASANT LITTLE GAME that will give you a message every day. It's a numerical puzzle designed to spell out your fortune. Count the letters in your first name. If the number of letters is 6 or more, subtract 4. If the number is less than 6, add 3. The result is your key number. Start at the upper left-hand corner and check one of your key numbers, left to right. Then read the message the letters under the checked figures give you.

Agriculture Events

Tuesdays, 3-7, and Senior Day, 2nd Tuesday, 10-2

Estill County Farmers' Market

The Estill County Farmers' Market is now open on Tuesdays from 3 p.m. to 7 p.m. On the second Tuesday of each month market hours are 10 a.m. to 2 p.m. This is Senior Day, but it is not limited to seniors; all are welcome. The market is also open on Fridays from 8 a.m. to 1 p.m. The market could close sooner if vendors sell out, so customers are advised to come early for best selection.

Thursday, September 12th @ 6:30 pm

Beef Cattle Market Outlook

The Estill County Extension Service and the Estill County Cattlemen's Association have partnered to host a beef cattle meeting on Thursday, September 12th, 6:30 p.m., at the Extension Office. Our guest speaker is UK Extension Livestock and Forage Economist Kenny Burdine who will discuss cattle market outlook. A meal will be provided.

Tuesday, September 17th @ 1-3pm

Rinse And Return Is Back

The Rinse and Return Plastic Pesticide Container Recycling Program will be offered once again in Estill County. This Kentucky Department of Agriculture program collects triple-rinsed, plastic pesticide containers for recycling. All farmers are encouraged to participate. Please remember, pesticide containers must be triple-rinsed, label packets removed, and no lids should be present.

The last 2013 collection date is Tuesday, September 17th, 1:00-3:00 p.m., at the Estill County Extension Office, 76 Golden Court (off Stacy Lane), Irvine. For more information, call 723-4557.

Thursday, September 19th, 10am-3pm

Third Thursday Thing Is Pawpaws

The September 19, 2013 Third Thursday Thing is about pawpaws. The workshop is at the Kentucky State University Research Farm, 1525 Mills Lane, Frankfort, KY. The event is from 10:00 a.m. to 3:00 p.m.

Topics to be discussed include Pawpaw Orchard Care and Maintenance, Pawpaw Processing and Value Added Products, New Pawpaw Varieties Around the Corner, and Pawpaw Orchard Tour and a Pawpaw Fruit Tasting and Cultivar Evaluation. Lunch will be provided. Call the Extension Office for more information.
