**Mia Hale scores 1,000th career point!**  
 Just a couple of weeks after reaching a milestone for grabbing 500 career rebounds as an Estill County Lady Engineer, sophomore Mia Hale reached another career high on Friday, January 30, 2020 when she scored her 1,000th point in a game against Breath County in Jackson. Estill announcer Donald Richardson told the appreciative audience on Monday night that "this puts Mia in rare company, there is only one other person in Estill County girls basketball to record 1,000 points and grab 500 rebounds." Mia was presented a ball in recognition by Estill head coach Ruth Hughes. Mia also set records as an Estill County Middle School player and led her team to one tournament win and two runner-up trophies.

The Estill County Middle School Youth Services Center and GEAR UP Opportunity Program recently hosted a Family Learning Night. During this evening parents and students were given the opportunity to better understand what KREP test scores, CERT test scores, and ACT test scores meant for the school and the students. During the evening parents and students learned about good

books that could be read on snow days and they got to use some math skills will creating cookies in a jar that they got to take home. These Family Learning Nights are occurring monthly at the Estill County Middle School and all students and parents are encouraged to participate.
