& Natural Resources

The number 25 is special this year. Not only does 2016 mark Lexington's 25th year to celebrate Arbor Day, but it is also the 25th anniversary of the founding of The Arboretum, State Botanical Garden of Kentucky.

With generous support from presenting sponsor, Kentucky Utilities Company, the culminating event of The Arboretum's annual month-long celebration, Party for the Planet, will kick off at 10 a.m. April 30 in the Pennyridge region of the Walk Across Kentucky with a proclamation by 4th

Arboretum To Celebrate 25 Years Arbor Day will also be celebrated April 30th

District Council Member Susan Lamb and Tree Campus and Tree City USA presentations. The Glendover Elementary School Chorus will perform, and there will be an official tree planting ceremony.

As in the past, many kinds of native trees will be given away while they last. At the University of Kentucky Department of Agricultural Economics table, visitors will be able to participate in a monarch butterfly survey. For each completed survey, the UK Department of Horticulture will provide a milkweed plant to The Arboretum. The plant is crucial to monarch survival in this region, as the butterflies feed exclusively off milkweed leaves.

The event will last until 2 p.m. and will include free admission to KU Day in the Kentucky Children's Garden. The Arbor Day event brings together experts on a wide range of subjects, including energy, the environment, invasive species, urban forestry, gardening,

wild birds, butterflies and bees. Exhibitors from organizations and interests such as America in Bloom, Lexington Tree Foundation and Wild Ones will have information and knowledge to share with visitors. Children's activities will be offered in the Kentucky Children's Garden, including Leaf Magic, presented by the UK Department of Forestry.

"There will be an abundance of information that our guests can use in their home landscapes, as well as adding to their knowledge of Kentucky's natural areas," said Molly Davis, director of The Arboretum, part of the UK College of Agriculture, Food and Environment.

Other Arbor Day at The Arboretum supporters include sponsors Kentucky American Water Company; Lexmark International; Dave Leonard Tree Specialists; Lexington-Fayette Emergency Planning Committee; Lexington-Fayette County Environmental

Commission; Lexington Tree Board; Braley Design; Community Tree Care Inc. and partners Ian Hoffman, Big Beaver Tree Service and Keep Lexington Beautiful Commission.

In case of rain, the opening proclamation will move inside the Dorothea Smith Oatts Visitor Center.

The Arboretum began in 1991 as a joint effort between the University of Kentucky and the Lexington-Fayette Urban County Government. It is located on the UK campus at 500 Alumni Drive and offers 100 acres of native plant collections representing the seven geographic regions of Kentucky, horticultural display gardens, trails, water features, native trees, the Kentucky Children's Garden and seasonal events. For more information about the Arbor Day celebration, visit The Arboretum website,

Educational programs of the Cooperative Extension Service serve all people regardless of race, color, age, sex, religion, disability or national origin.

UK Equine Nutrition Short Course

An inaugural University of Kentucky Equine Nutrition Short Course will be held from 8:30 a.m. to 4 p.m. May 14. The event is for horse owners interested in understanding how nutrition can affect their horses' health and longevity. The event is presented by UK Ag Equine Programs' equine nutrition working group within the College of Agriculture, Food and Environment.

"There has been increasing interest in how feeds and feeding management affect the risk for metabolic and digestive diseases in horses. The nutrition working group has assembled a group of

outstanding speakers and innovative, hands-on activities that will give horse owners practical information about desirable and undesirable feeding practices," said event organizer Laurie Lawrence, a professor and equine nutrition researcher in the college's Department of Animal and Food Sciences.

Morning session lectures, which will be held at the UK Veterinary Diagnostic Laboratory, 1490 Bull Lea Road, in Lexington, will be presented by UK equine faculty and graduate students as well as industry practitioners. Topics include cracking the code on nutri-

tionally-related diseases; equine digestion—colic, ulcers and other digestive disorders; how calories, affect body weight and body condition; what's in horse feed; and horse nutrition myths and mysteries.

Afternoon labs, which will be held on UK's Maine Chance Farm, include: pasture plant identification; tapes, weights and body condition; the right feed in the right amount; pasture management; and feeding management tips and tools. Space is limited. The cost is \$75 and includes lunch. Those interested in attending can register online at <https://UKEquineNutrition>.

Eventbrite.com. Registration deadline is May 1.

Through the mission areas of a land-grant institution, UK Ag Equine Programs serves as the front door to equine in the college and represents the breadth of equine offerings at UK and the college's long-term commitment to serving the state's signature equine industry.

For more information about equine care, contact the Estill County Extension Office at 723-4557.

HERE IS A PLEASANT LITTLE GAME that will give you a message every day. It's a numerical puzzle designed to spell out your fortune. Count the letters in your first name. If the number of letters is 6 or more, subtract 4. If the number is less than 6, add 3. The result is your key number. Start at the upper left-hand corner and check one of your key numbers, left to right. Then read the message the letters under the checked figures give you.

The Garden Bug

Grape hyacinth

Grape hyacinths start from small bulbs. Plant them in groups of ten or more, with the bulbs twice as deep as they are tall and a couple of inches apart. They grow in sun or light shade. Don't plant them where it's too wet or too dry. They spread very quickly and can be quite invasive; plant them where it is acceptable for them to spread freely. The flower spikes don't appear until mid-spring. There may be some variation in color, depending on which ones you plant, but smoky blue is the most common color. Once their leaves die off, you can cut them back.
