1.5 miles south of Booneville, KY on Hwy. 11 in the Lone Oak Industrial Park

Garden Guide

The Garden Bug
Soil temperatures
For most trees, surface temperatures can go as low as -40 to -60 F without doing serious damage to the trunk and crown; but the temperature of the surrounding soil must not dip below 20 to 25 F or the roots of the tree may be killed. Maintaining a layer of leaves and mulch around the tree will protect the soil from freezing conditions, as will a layer of snow.
