

Saturday's "Light Up The Rivertown"

Sandy Melton was one of many exhibitors set up at Light Up The Rivertown in the courthouse on Saturday.

Clara Wiseman is a regular craft exhibitor. She has lot of fabric ornaments, including Raggedy Ann and Andy dolls.

Shawnee Rogers, a student at the Estill County High School, was recognized by members of the school board on Thursday night for her academic achievement.

Principal Chris Winkler stated that Rogers had attended the National Academy of Future Scientists and Technologists in July that was held in Boston, Massachusetts. He said she was nominated based on her academics and that she currently has a GPA of 4.13 and on her first attempt scored a 27 on the ACT.

Winkler said that Rogers has tremendous potential because she is not afraid to experience new things and that she has the intellectual ability, but also has the willingness to learn and grow.

The board presented Rogers with a medal of excellence for her outstanding achievements.

Chasity Arvin was a first-time exhibitor at "Light Up The Rivertown." She had lots of homemade ornaments and jewelry.

Barbara Chaney had homemade Christmas ornaments and other seasonal crafts to sell. She is a regular exhibitor.

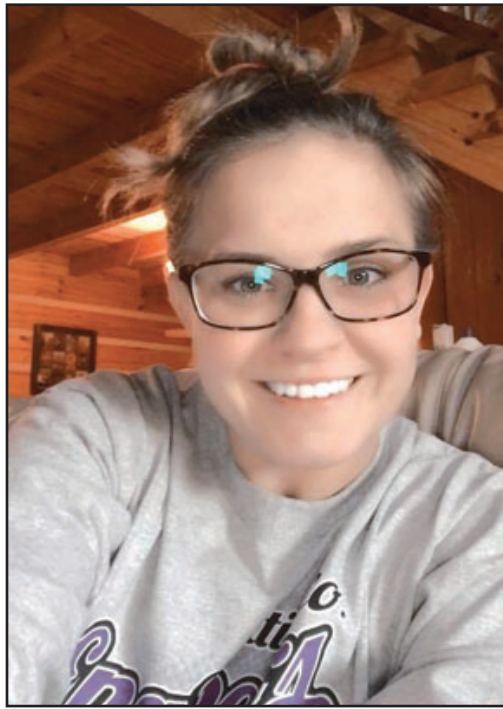

Jane Conrad's business is "Whispering Woods Knits." She has lots of warm knitted and crocheted items to sell.

Estill County Board of Education October's Mountain Movers

Sarah Beard was chosen as the Certified Mountain Mover for her excellence in the classroom, dedication to her students, her creativity, and strong leadership ability.

Laura Freeman was recognized by her peers as Classified Mountain Mover for her excellence service, her contributions to Estill County Schools, and her positive attitude.

Nelle Williams was selected as Community Mountain Mover for developing positive relationships that have had a direct and lasting effect on the lives of Estill County students.

The Estill County Middle School Youth Services Center Student of the Week is **Ricky Crowe**. He is the son of Rhonda and Charles Crowe. He is currently in the 8th grade and enjoys playing games.

3D Mammography is now available

3D mammography is the most advanced screening and diagnostic tool available to detect breast cancer.

Detailed 3D imagery of your breast exam results in better accuracy, fewer callbacks, less anxiety and — most important of all — can result in earlier detection of breast cancer.

If you're over 50*, a regular screening mammogram could save your life.

* Based on risk factors, women ages 40-49 may benefit from regular mammograms. Consult your doctor to discuss when you should be screened.

Caring together. **MERCYHEALTH**
